

Solar Works in Oregon

Believe it. We actually get better solar exposure than Germany and Japan, two of the countries leading the world in solar adoption. Solar in Oregon saves you hundreds on energy bills each year, insulates you from energy inflation and adds value to your home. Incentives and tax credits make this the best time to go solar, as you'll save up to 85% on a solar system today.

We offer full service design and installation of:

- Solar Hot Water
- Photovoltaic
- Both Residential and Commercial Projects

Benefits of Solar:

- Investment pays for itself in five to ten years, and returns two or three times its value in energy savings over the lifetime of the system
 - Increased property value with the installation of a solar system
 - Protection from future energy inflation: Oregon utility costs are climbing. Utility rates rose in Jan. 2011 and more hikes are on the horizon. Protect yourself from future rate hikes by becoming more energy independent!
 - Local and national studies report that solar photovoltaic systems save homeowners hundreds of dollars annually.
 - Become part of a community supporting the sustainable utilization of the earth's natural resources!

Purpose and Mission

LiveLight Energy, LLC of Beaverton is one of Oregon's homegrown solar designers and installers. It is a multi-generational family business, which evolved in 2009 from Robert Knowles Construction (RKC) of Newberg, Oregon a local construction company that has been family-owned and operated since 1983. This unique combination of solar and construction expertise and local roots allows LiveLight to provide customers with unparalleled quality and hands-on customer support.

Our company is a local trade partner of Solar World of Hillsboro. All other materials are purchased from local trade allies. These partnerships are collectively responsible for more than 1,000 family wage jobs in Oregon. Since its inception in 2009, LiveLight Energy, LLC has grown six-fold in sales, and hopes to continue this rapid job creation and stimulation of the local economy. The vision of the executives of LiveLight Energy is to make the Pacific Northwest, especially Oregon, a hub for solar energy collection and distribution.

Through community outreach and education programs such as Solarize Pendleton and Solar Beaverton, and extended customer service, LiveLight strives to assist all customers in understanding the financial and economic incentives of investing in local sustainable energy to stimulate economic growth, and to foster financial stability for the Pacific Northwest.

In addition, we offer:

- System monitoring packages
- Service and maintenance packages
- Twenty-five year warranty on solar systems
- Free home site assessments to optimize the sun exposure and space available to each customer
- Individualized design, pricing, and financing models for every customer, optimizing customer satisfaction through customization.

We'd like to help you save energy, save money, and save the planet! Call or write
