

Why Solar?

The answer is simple—we’re creating a better home investment for you. The energy cost savings, potential value appreciation of your home, and reduction to global warming are why we’re doing this.

Legend Homes is teaming up with **LiveLight Energy, LLC** to bring the advantages of solar to you.

Here are the top reasons why you should buy a **Legend EarthSmart™** home that utilizes **LiveLight Energy™**:

It’s like getting the solar system for free! Based on the costs we’re passing through, your monthly power savings will quickly surpass the additional cost on your monthly mortgage. Over time, as energy rates increase, your energy savings will start paying you back more and more—you couldn’t ask for a better investment.

*See sales representative for details. Wattage needs and availability of solar vary per home and home orientation. Location of panels and other installation details vary from one home to another, depending upon roof angles. Mortgage and energy savings are approximate and will vary. Tax credits and system costs are approximated and vary per situation. All information is subject to change without notice.

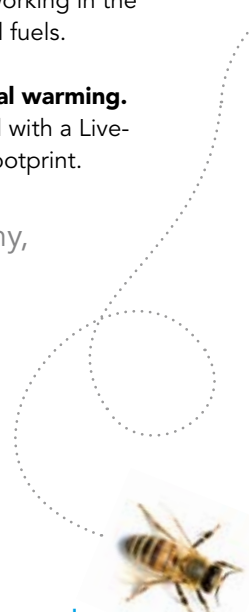

Take advantage of amazing Federal Tax Credits—30% of your cost on the system. This can be up to a \$2,000 tax credit to you. And, Legend is passing all of their solar incentives savings straight through to you to make solar more affordable.

Purchasing this solar home supports the local economy. We install SolarWorld panels, manufactured in Hillsboro, Oregon. This supports over 500 local jobs. Renewable energy also keeps more of our money working in the local economy, instead of being shipped overseas to buy fossil fuels.

Buying this home will help you do your part to tackle global warming. The energy efficiency of a Legend EarthSmart home combined with a LiveLight Energy solar system will drastically reduce your carbon footprint.

Why Solar? It's affordable, it helps the economy, and it reduces your carbon footprint.

Call *Legend Homes* at **503.684.0428**, for more information.
